

# Get More Done: *Two Countries, One Platform*

Run an efficient fleet on both sides of the border.

Do you have vehicles in Canada?

You need easy access to data for all your vehicles. Having separate platforms and vendors for U.S. and Canadian fleets complicates the process, costing you time and money. With Donlen, you could have...

- A single platform for all of your vehicle data
- Canadian and U.S. reporting at your fingertips
- Coast-to-coast networks
- Bilingual driver support, 24 hours a day, 365 days a year
- Provincially licensed/Class-A technicians
- A single provider focused on exceeding your fleet expectations

## The Right Data That You Need

FleetWeb®, Donlen's superior fleet management platform, lets you manage data for U.S. and Canadian fleets. **FleetWeb provides the same high-quality information for Canada as it does for the U.S., allowing you to consolidate your data and ease the complexities of international fleet management.**

## Services You Can Count On

Donlen provides your Canadian fleet with the same services available to U.S. fleets, but specifically optimized for the Canadian field. With the Donlen MasterCard Fuel Card—accepted at 98 percent of fuel locations in the U.S. and Canada—drivers can utilize major U.S. and Canadian fuel vendors. You can also receive support through our bilingual maintenance advisors in Canada. By consolidating accident management on FleetWeb, drivers receive the same attentive service in both countries.

**Learn more about our Canadian coverage and how to simplify your fleet management.**

## Strategic Insights to Run a Cost-Efficient Fleet

Donlen provides strategic consulting and account management that accommodates your fleet structure. We give you the most relevant and necessary data for vehicle management in both countries.
