

FleetWeb® Mobile

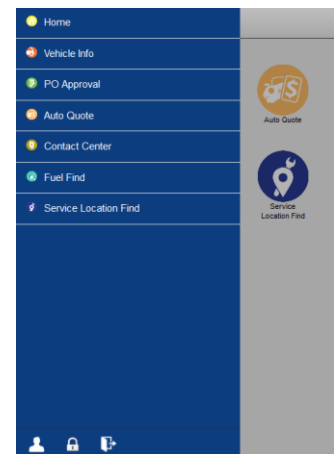

FleetWeb Mobile seamlessly exchanges data in real time with existing platforms, assuring the same functionality you utilize online is available to you when you need it; in the office or on the road.

Ability to remember username

Quick access to mobile functionality

Navigation menu available throughout application

FleetWeb Mobile functionality includes:

Vehicle Info – Provides an overall snapshot of the driver's current information.

PO Approval – Quick access to approve purchase orders when necessary.

Auto Quote – Submit an Auto Quote request.

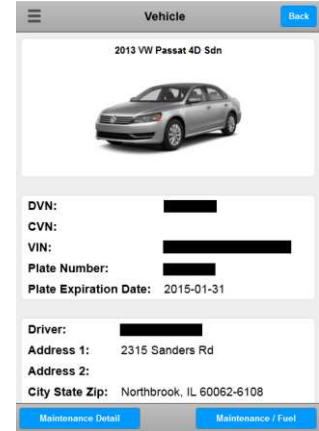

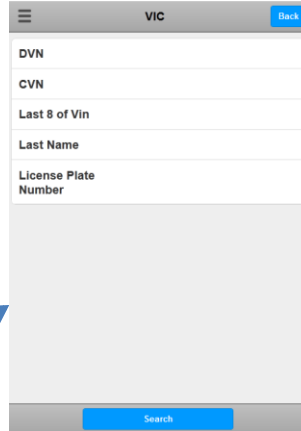

Contact Center – One touch access to the appropriate queue in the Donlen phone tree.

Find Fuel – Find fueling stations near your current location or specified address.

Find Service – Find service/repair stations near your current location or specified address.

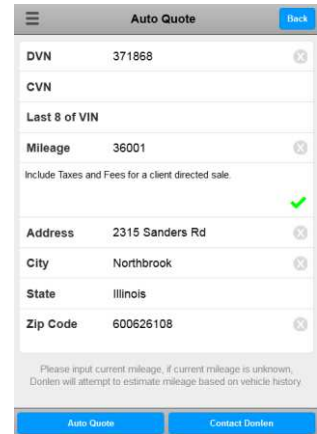

Vehicle Info

Select a vehicle to gain real-time access to vehicle information, fuel, maintenance, and billing information. Simply swipe or click through the informational screens as necessary.

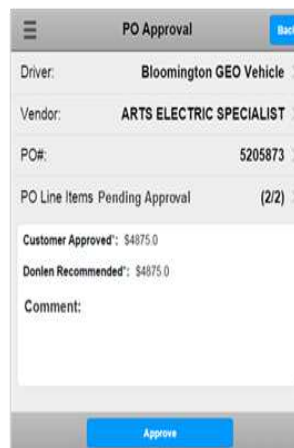

Auto Quote

Real-time access to vehicle, fuel, and maintenance information. Simply swipe or click through the informational screens as necessary.

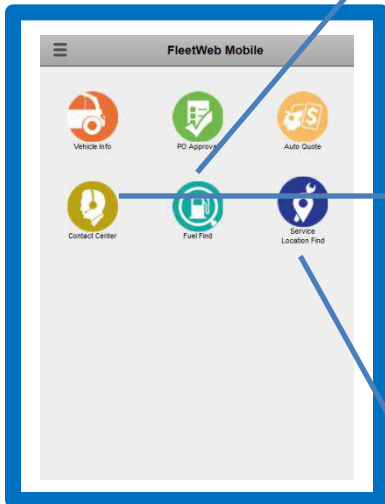

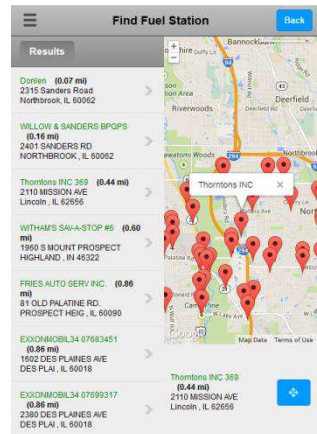

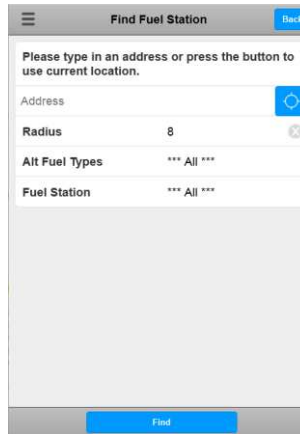

PO Approval

Ability to view and approve purchase orders when necessary. Detailed descriptions about the vendor and services performed are viewable.

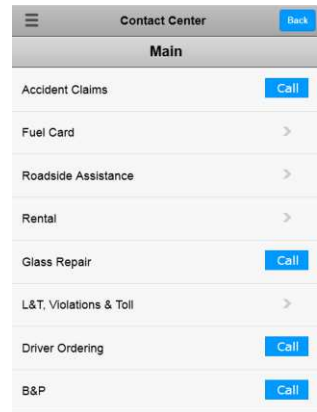

Find Fuel

Use your current location or enter an address to find fueling stations in the area. Results can be filtered by miles, alternative fuel types, and fuel brands. Directions available with the click of a button.

Contact Center

Easily viewable phone tree to provide quick access to the phone queue. Simply click on the call button for the appropriate department.

Find Service

Use your current location or enter an address to find service stations. Results can be filtered by miles and national account brand. Directions available with the click of a button.
